

Objectives:

Upon completion of this course, users will:

Know how to create master data for Project Definitions, WBS elements, and Assets under Construction. Be able to accumulate capitalized and non-capitalized costs. Understand the process of settling costs collected in WBS elements to assets under construction and major maintenance projects and settling them to a fixed asset shell. Learn about depreciation of assets and AuCs. Know what reporting tools are available in AASIS and how to use them to locate data associated with projects, WBS elements, and assets.
